

I support keeping all 6 rules of broadcast ownership intact.

The corporate greed that gave us Enron, Tyco, Healthsouth and others and led to our current economic and social nightmare will only lead the Media conglomerates to wreak similar havoc on what is left of our democracy by limiting what we see and hear. A diverse market is a strong market, socially, economically, and politically. If you are to do anything positive, it would be to begin breaking up the Monopolies you have allowed to develop over the last 10 years. If you want to make our country strong again, do not give in to corporate greed.

Sincerely,

Don Meserve
